# | Global Presence

# Accolades and Recognitions

# | Main Businesses

## Connectivity

network interconnection, express  
connections, financial premium network  
smart media network, GSN  
mobility services, international roaming

## Security

network security, information security  
terminal security

## Application

customized industrial solutions for  
finance, media, transportation & logistics  
government, energy & manufacturing  
e-commerce & healthcare

## Computing

Unicom Cloud, SD-WAN  
data center service

## Big Data

visualization platform  
precision marketing platform  
big data solutions for smart parks  
big data solutions for automotive industry

# CONNECTIVITY

Advancing Intelligent Connectivity Towards  
a New Era of Smart and Interconnected Everything

## International Network Operation Center (INOC)

3 INOCs

Hong Kong, China    London, UK    Los Angeles, USA

### International Express Line

fast response &  
seamless global connectivity

### Financial Private Network

ultra low-latency connectivity &  
high security

### Smart Media Network

high-cost efficiency,  
flexibility & scalability

### High-Bandwidth Network

seamless connectivity &  
rapid data transfers

# Dedicated Network Services

Intelligent Network, Diversified Scenarios, Visualized Service

## IP Transit

Provide different access methods and bandwidths for customer who has own AS Number to build connection with China Unicom to travel through CN network to its final destination

## Global Smart Network (GSN) Solution

GSN links with Cloudbond as the core, and adopts SD-WAN, multi-cloud, DIA, CPE and other multi-technology methods for hybrid network, providing click-on service with agile global delivery

# Excellent Cross-border Mobile Service

Elevating your international business travel experience with our expertise as your trusted advisor for smart applications

## 4G / 5G One-Data-Pack and Global Roaming

global roaming with multiple plans and data sharing across 67 destinations, with a single subscription

## One-Card Multiple Number

mainland China numbers for cross-border individuals, simplifying international connectivity

## Prepaid Travel Card

tailored travel services to over 70 popular destinations, meeting business and leisure needs from 1 to 360 days

## 5G Use Cases

enabling seamless connectivity for autonomous driving, smart cities and automated manufacturing

## Global Roaming Communication Services

offering a diverse range of products and services,  
including data, voice, SMS and beyond

## Smart Outbound Travel Ecosystem

establishing an overseas product and  
service platform for our customers

# Global Roaming

## One-stop Platform with Cross-Industry Services

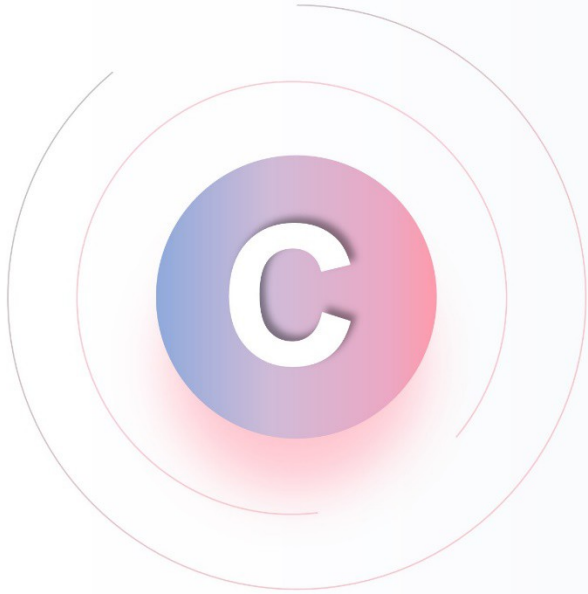

delivering embassy information, translation  
services, restaurant recommendations,  
exclusive ticket special offers

# COMPUTING

Unlock the Potential of the Digital Economy  
Building a Leading "Computing Power Engine"

Cloudbond

(Internet Data Center)

# China Unicom Global Intelligent · Cloud Data Center

Driving digital transformation through integration of computing and networking capabilities

## International Finance Client Service Center

### High Reliability

Dual power supply, multiple routes, quasi-Tier IV data center

### Low latency

Integrated layout of cable landing station & DC

## International Security Operations Center

### Security

Global 24/7/365 NOC + SOC Center

### Compliance

Global compliance and security certification

## Global Convergence Center for Cloud Services

### Geographic Advantage

Core area of the data center located in Hong Kong, China

### One-step to the Cloud

Interconnected to major global cloud providers and DCs

## Advanced Green Computing Center

### Hyperscale Computing

Hyperscale intelligent computing center supporting 20,000 GPUs

### Low carbon and environmental

Flexible scheduling, advanced cooling, energy saving and emission reduction

## Belt and Road Infrastructure Hub

Schedule a Tour

# BIG DATA

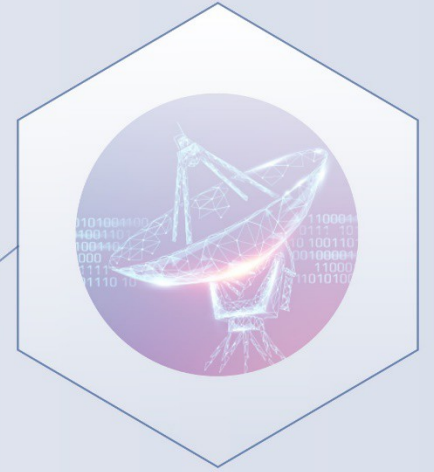

Your Preferred Service Provider for Driving Transformation  
Building Exceptional "Unicom Data" Solutions

## Big Data Visualization Platform

## Big Data Precision Marketing Platform

## Big Data Solution for Smart Parks

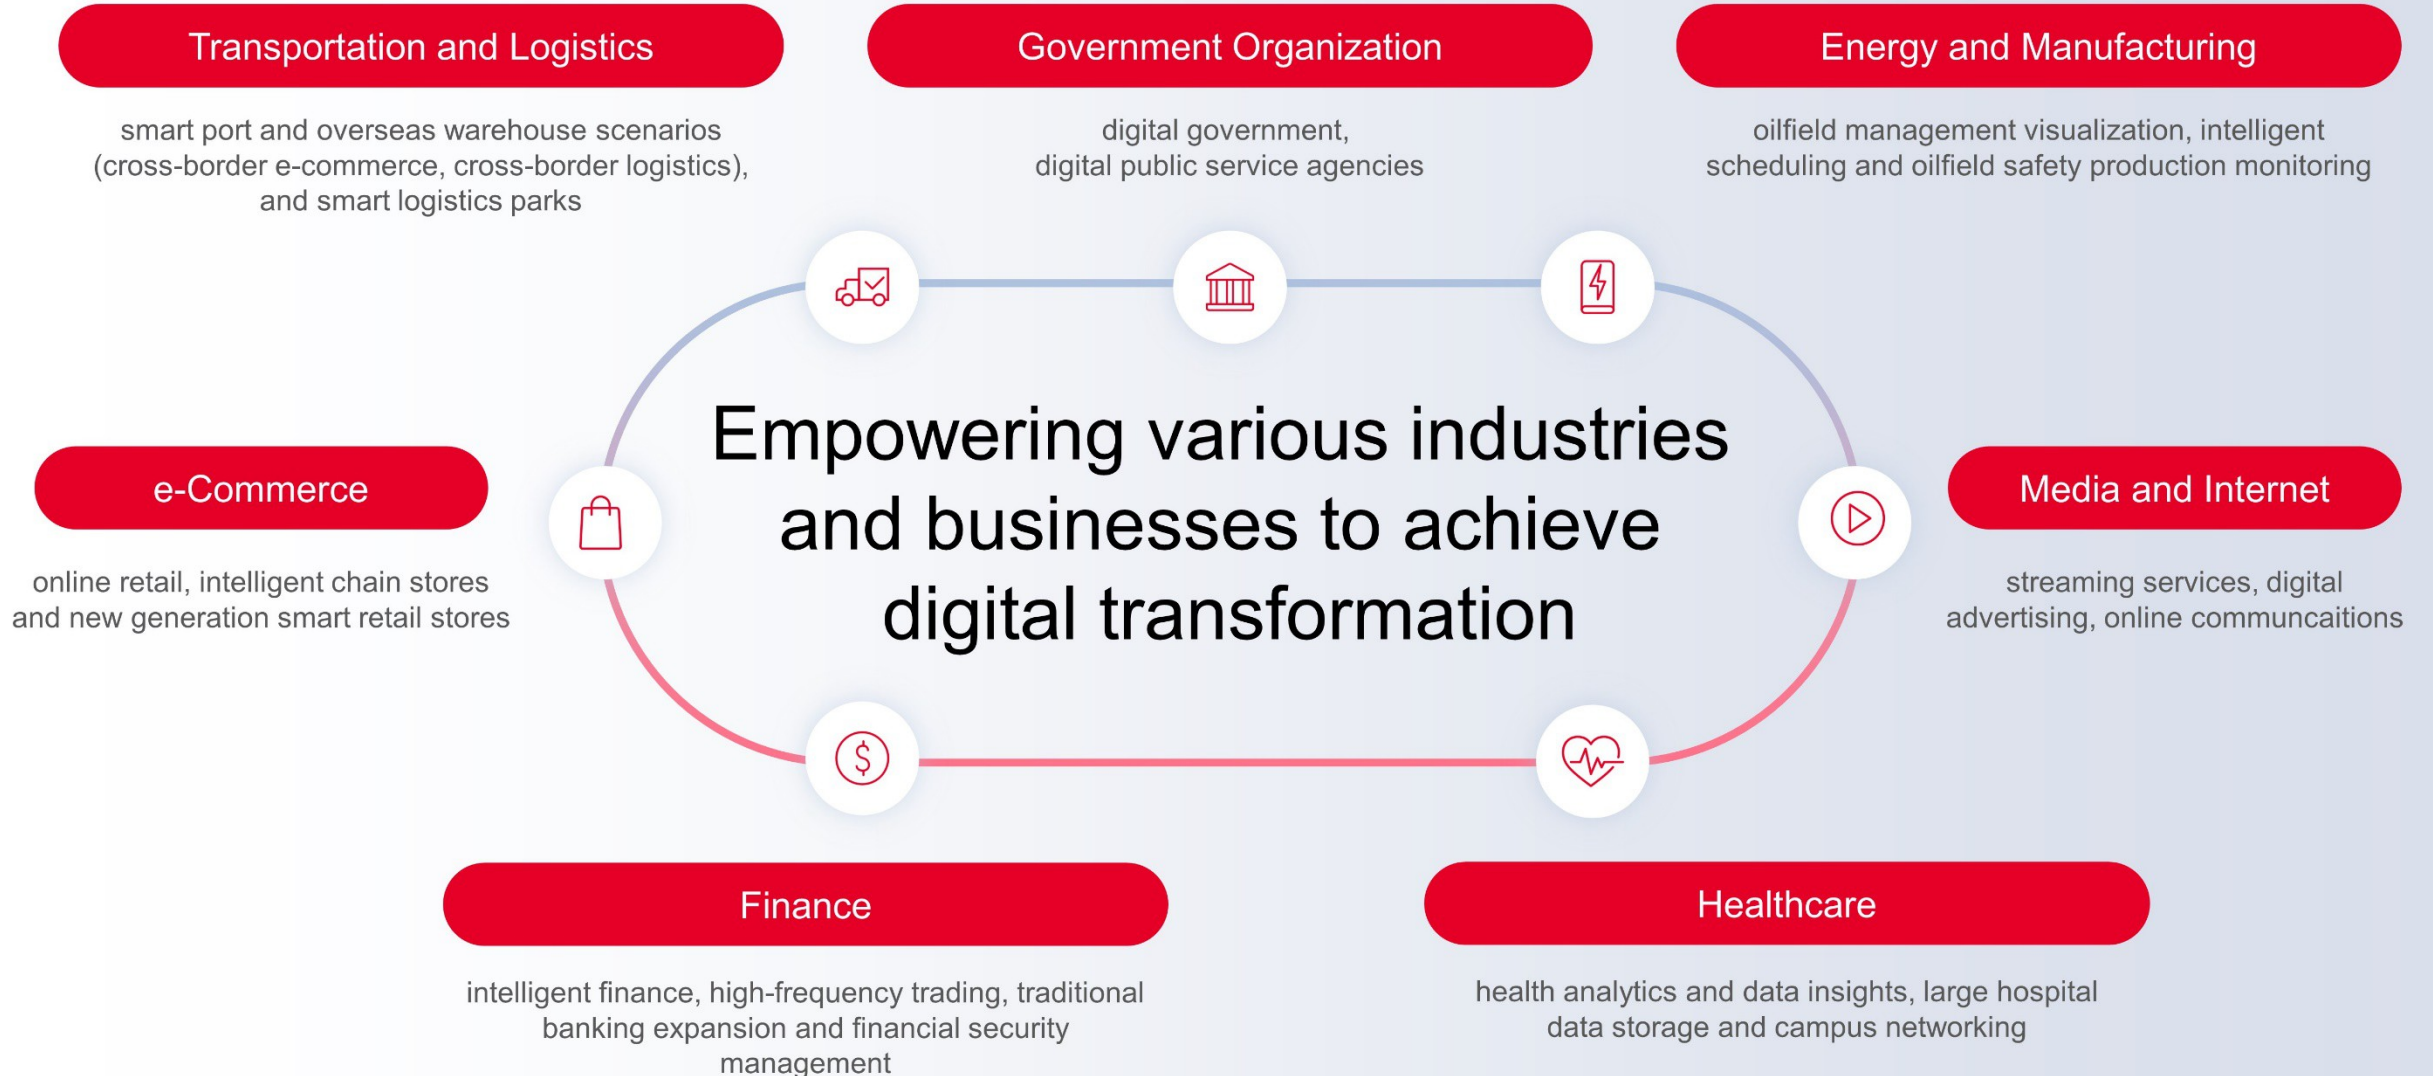

## Big Data Solution for Automotive Industry

# APPLICATION

Your Preferred Partner for Digital Transformation  
Enabling Large-scale Application and Digitization

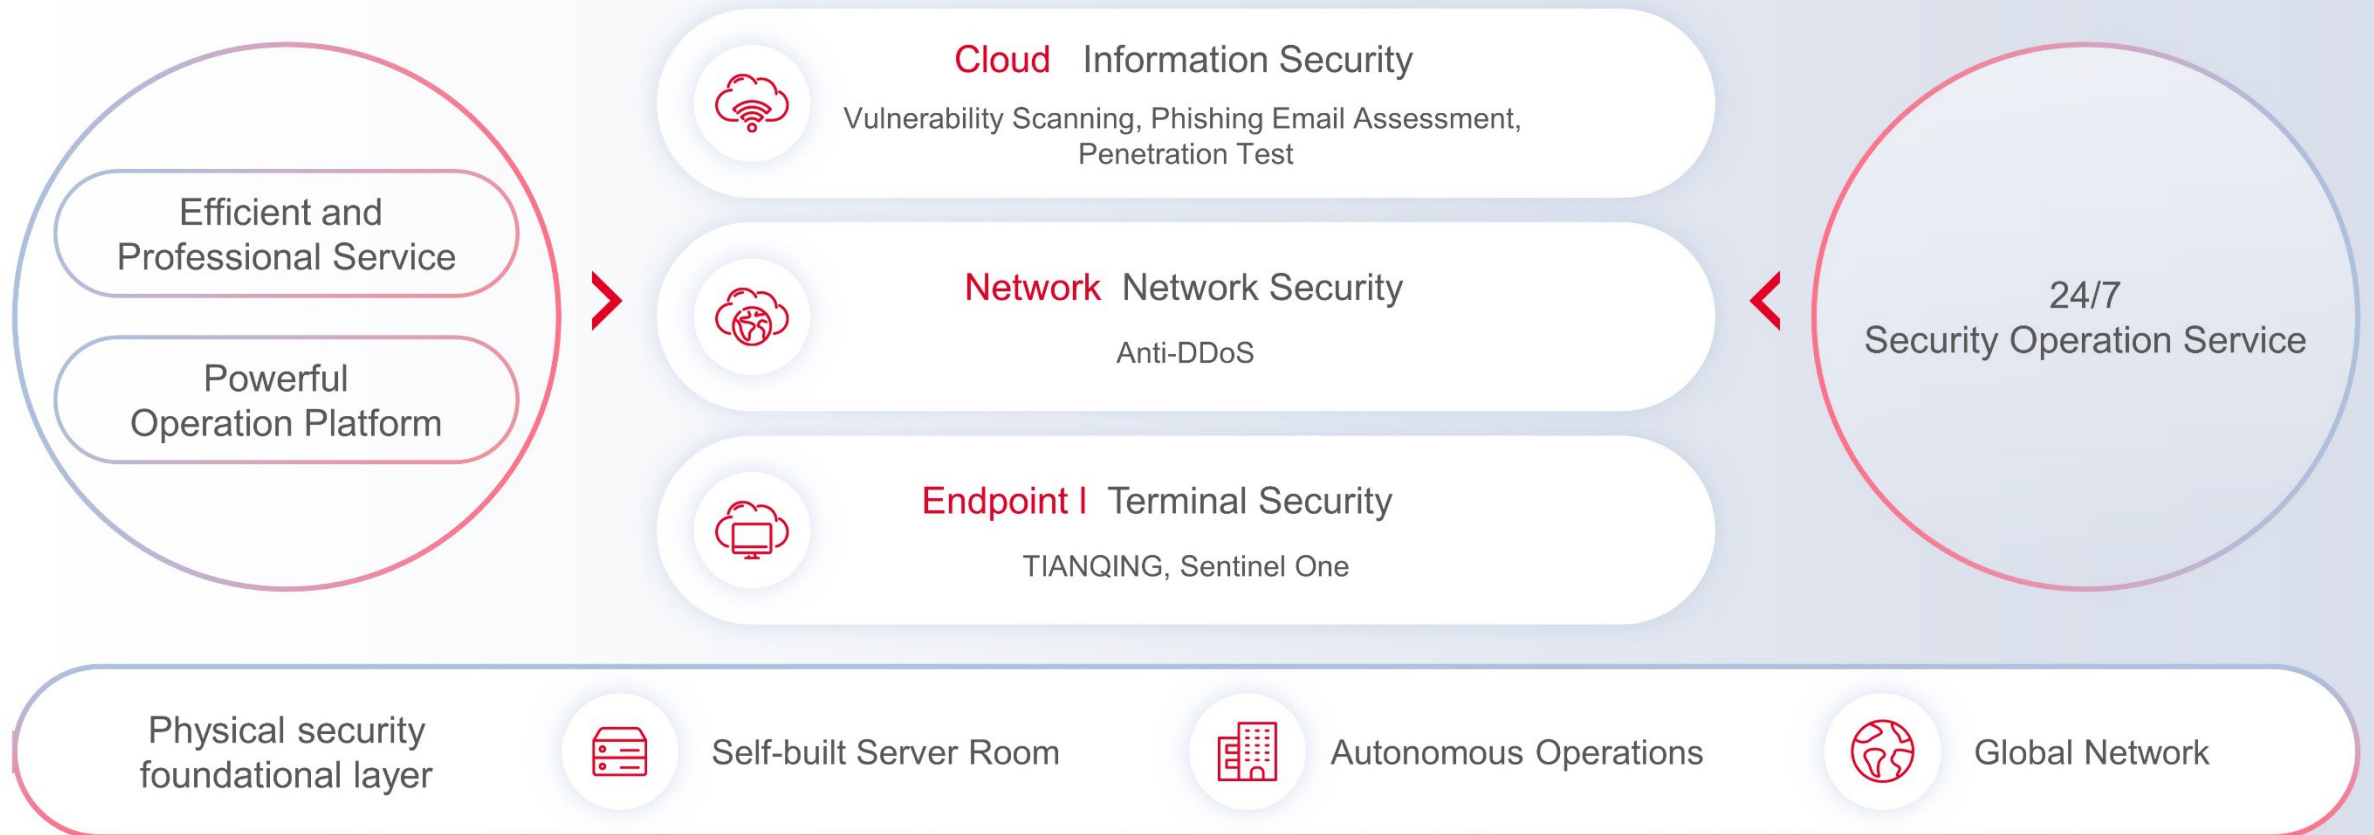

# SECURITY

Leading Provider of Digital Economy Security  
Your Trusted "Security First Shield"

# Security First and Trustworthy Operation Capabilities

# Creating a New Digital Economy Ecosystem Together

UNION FOR PARTNERS

# | China Unicom Global Union for Partners

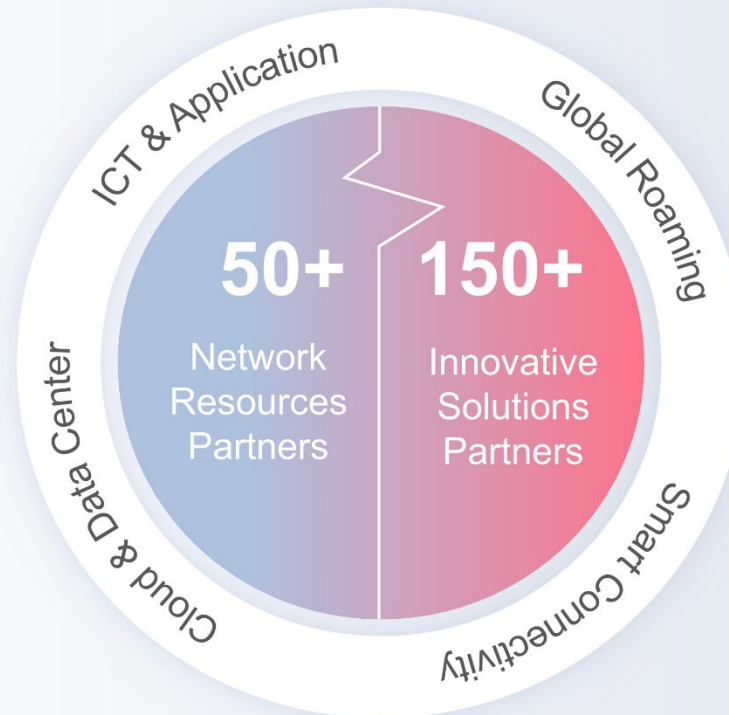

## Union for Partners

### - UP Program

UP Program aims to achieve win-win outcomes through collaboration, enhance synergies, and unite the strengths of all members of the global alliance, advancing innovation and sustainable development in the telecommunications industry.

UNION FOR PARTNERS

## Objectives and Vision

### Cooperation

Establishing a reliable platform that fosters cohesion and promotes collaboration, leveraging all members' strengths to cultivate ecosystem competitiveness.

### Sharing

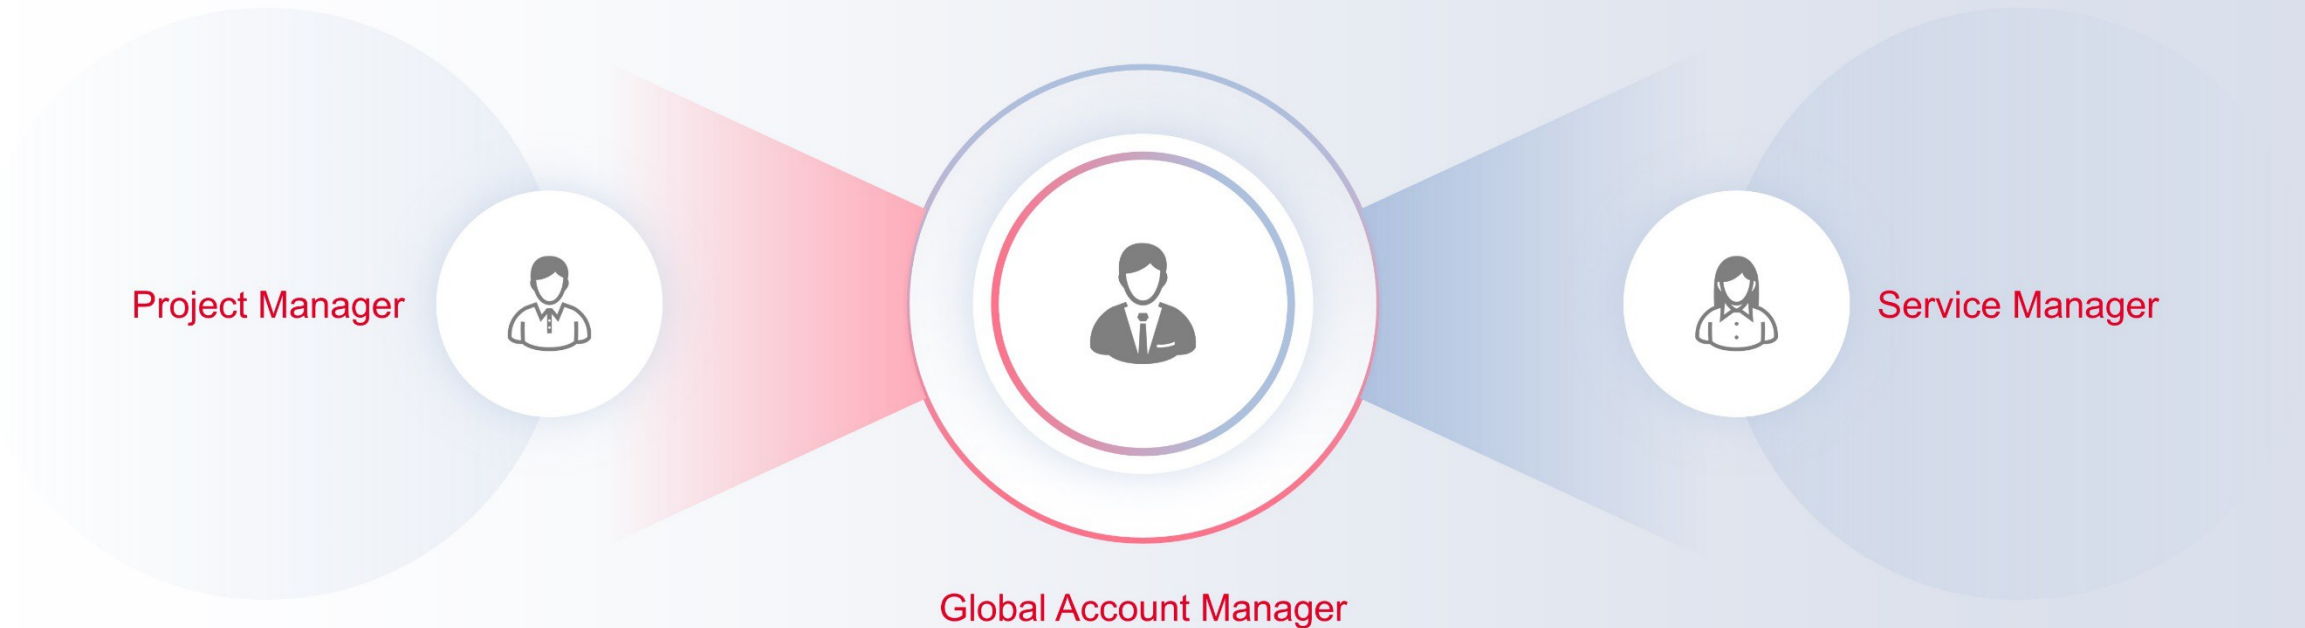

Sharing successful experiences, advanced business models, and innovative applications, while exploring new trends, directions, and hot topics.

### Innovation

Fostering innovation in services, products, and applications, collaboratively tackling challenges, seizing opportunities, and spearheading the industry's growth.

# Global Account Service System

End-to-end, Whole Process, Full Lifecycle, Customized Service

# Professional, Secure, Trustworthy Sustainable, Smart, Responsible

## Environmental

- Achieving low-carbon operations
- Promoting green and sustainable manufacturing
- Addressing climate change
- Empowering green development
- Optimizing green management systems
- Contributing to communication security, emergency response, disaster relief, and epidemic prevention and control

## Social

- Serving as a solid foundation for the digital infrastructure
- Becoming a leading force in empowering various industries
- Creating an innovative-driven development as the vanguard
- Focusing efforts on ensuring network security as guardians
- Building a win-win digital industry ecosystem
- Fostering a hub for innovative talents
- Serving as a catalyst for the development of people's livelihood

## Governance

The Board is committed to high standards of corporate governance and recognizes that good governance is vital for the long-term success and sustainability of the company's business.

Achieve a Better Future.  
Together
